Despite policy changes, land rights must be strengthened for forward-looking Chinese farmers, writes Proyster Man and Gao Yu

Country stresses

Infringements on the Three Gorges Dam project are one of the most visible signs of the Chinese government's pursuit of economic growth at any cost. Yet the government's suspicion that the Three Gorges Dam project will solve their water problems is unsustainable, especially in the face of the unknown environmental impact, as the water under the dam will take at least 30 years to clear.

The quake's impact will be substantial, but it will not derail the national recovery
